

19 November 2004

In CWA Version 3.2, SDDC is adding a new validation to the EDI processor for the Country Code.

When CWA Version 3.2 is posted to production, all Invoices for Hawaii shipments will require a Country Code of "US". If a Country Code is left blank or entered anything other than "US", the invoice will be rejected and a rejection error message will be sent to PowerTrack.

Please continue to use all proper spellings as listed in the DTOD Locations file. A reference file is available on the SDDC web site at:
